https://whova.com/portal/registration/alpf_202108

The ALP Forum 2021 brings together policymakers, donors, practitioners and other experts involved in enabling low emission and climate-resilient development in the Asia-Pacific.

Countries in Asia-Pacific have embarked on ambitious Nationally Determined Contributions (NDCs) and a long-term low emission development path to achieve the climate change goals.

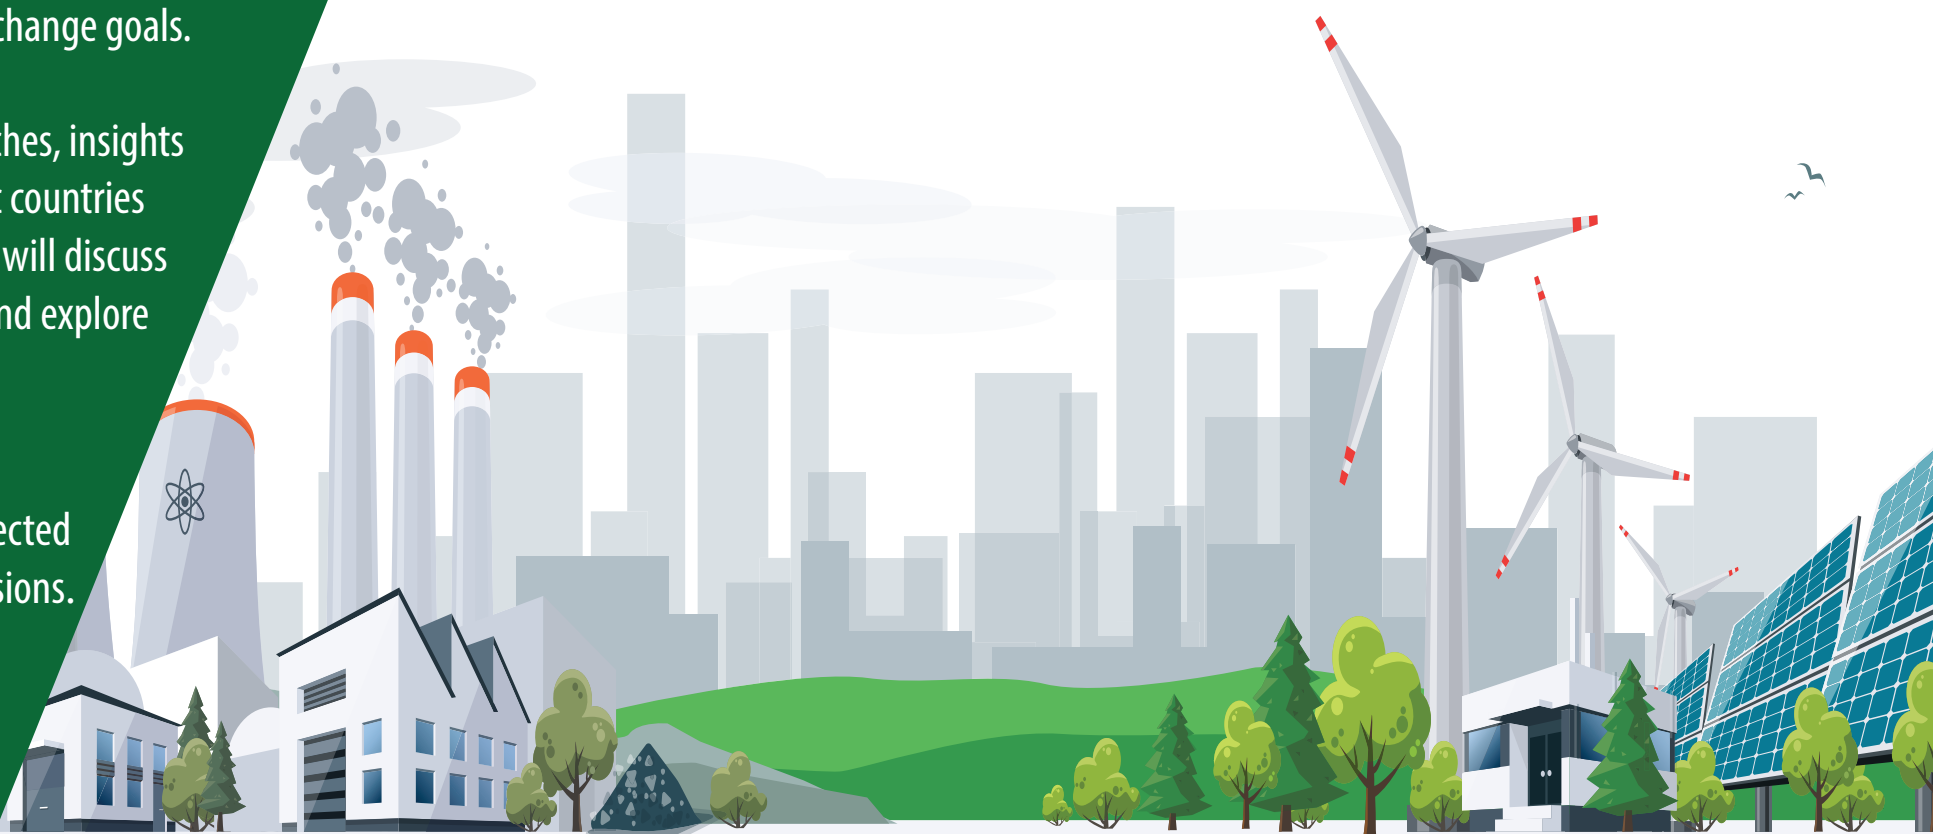

The Forum will showcase thought leadership, innovative and integrated approaches, insights on important trends, and the challenges and lessons learnt from key Asia-Pacific countries to enable peer learning, sharing and replication of good practices. Stakeholders will discuss opportunities, tools and models for effective low-carbon policies and projects, and explore opportunities for collaboration on building resilience and lowering emissions.

Language Options:

The forum will be organized in English. Translation is available - **Chinese** for selected sessions (Inaugural, Plenary 1, Plenary 2, A2, B2 and B4) and **Bahasa** for all sessions.
